## About This Content

The Western Pacific was one of America's great railroads, famous for its scenic and rugged path through California's Sierra Nevada Mountains via the majestic Feather River Canyon. Now you can experience even more authentic and challenging Western Pacific railroading in the Feather River Canyon with High Iron Simulations' Feather River Canyon Scenario Pack 02!

Featuring ten career scenarios based upon actual Western Pacific operations, Feather River Canyon Scenario Pack 02 takes you back to the late 1960s and early 1970s and puts you at the throttle for Western Pacific passenger, main line freight, local freight, and yard operations across the full length of Train Simulator's popular Feather River Canyon route.

You'll go to work as the engineer of the famed California Zephyr with elegant Electro-Motive FP7s as power; you'll handle freight and local duties aboard Western Pacific's General Electric U30Bs, EMD GP35s, and veteran EMD F7s, and you'll handle challenging switching tasks using Western Pacific's distinctive dual-control-equipped EMD GP20s!

Developed by noted scenario author Gary Dolzall, Feather River Canyon Scenario Pack 02 will take you to Oroville, Keddie, Quincy Junction, and along the Western Pacific's High Line to experience Feather River Canyon railroading at its dramatic best.

Note: The pack's scenarios require the Train Simulator Feather River Canyon route. Select individual scenarios also separately require: Train Simulator's Western Pacific FP7 California Zephyr Add-On; Western Pacific GP35 Add-On (DTM); Western Pacific GP20 High Nose Loco Add-On (Reppo). All required content is available at the Steam Store.

Experience the challenges and grandeur of classic Western Pacific railroading – in Feather River Canyon Scenario Pack 02!

---

Definitely not worth \$11.49 in anybody's money as the scenarios do not work because they don't have the required rolling stock and nothing is said about purchasing any extras. I tried uninstalling and re-installing and it still does not work. I don't see any point in purchasing any more add-ons for Train Simulator.. The scenario pack promises to be quite exiting, once I obtain all the necessary add-ons. \$\$\$\$\$. I have tried most of the scenarios and if you have the required dlc they all work fine. Very fun and interesting.
